Education

Kent State University **Aug. 2023 – May 2028**
Bachelor of Arts in Computer Science *Kent, Ohio*

- Activities & Leadership: Society for Collegiate Leadership & Achievement (Inducted Member)

Skills

Data Analysis: Data Cleaning, Exploratory Data Analysis, Data Visualization, Data-Driven Decision Making
SQL: Querying, Filtering, Aggregations, Joins, Subqueries, CTEs, CASE Statements
Programming: Python, Java, Kotlin, C, C++, JavaScript, HTML/CSS
Developer Tools: VS Code, PyCharm, Jupyter Notebooks, Android Studio
Technologies: Firebase, GitHub, Jetpack Compose, Unreal Engine
Professional: Customer Service, Technical Documentation, Ticketing Systems, Cross-functional Collaboration

Experience

The Global Career Accelerator **August 2026 – May 2027**
Data Analyst Fellow *Remote*

- *Certifications: Querying Data · Python & Data · Intercultural Skills · AI Professional Skills*
- Analyzed real-world datasets using SQL and Python (Pandas) in Jupyter Notebooks to identify trends, uncover patterns, and generate actionable business insights.
- Participated in weekly LiveLabs, collaborating with global teams to solve authentic business problems and develop data-driven recommendations.

Spectrum **November 2023 – February 2024**
Residential Connectivity Specialist *Akron, Ohio*

- Performed on-site installation and configuration of residential networking equipment including routers, modems, and cable connections, ensuring reliable connectivity for new and existing customers.
- Guided customers through device setup and network troubleshooting, explaining technical concepts in clear, accessible language to users with varying levels of technical familiarity.
- Diagnosed and resolved basic connectivity issues in the field, applying systematic troubleshooting methods to identify hardware, configuration, and signal-related problems.

Nationwide **October 2021 – November 2023**
Claims Processing Specialist *Columbus, Ohio*

- Performed high-volume data entry and record management within enterprise claims software, maintaining accuracy and consistency across large datasets in a fast-paced professional environment.
- Navigated and operated multiple internal business systems simultaneously, developing proficiency in enterprise-level software workflows and digital record-keeping processes.
- Documented and tracked claims through structured digital systems, applying attention to detail and organizational skills to ensure complete and accurate records, directly paralleling IT ticketing and incident tracking workflows.

Projects

Intel — Sustainability Impact Analysis | *SQL*

- Analyzed 150,000+ device records using SQL joins, aggregations, and CTEs to evaluate energy savings, identify sustainability trends, and recommend strategies to reduce CO_2 emissions.

The Recording Academy (Grammys) — Website Performance Analysis | *Python (Pandas, Plotly)*

- Analyzed Grammy.com and RecordingAcademy.com website performance using Python (Pandas) and Plotly to visualize traffic trends, evaluate user engagement, and recommend improvements to digital strategy.

Killjoys App | *Kotlin, Firebase, MVVM* **September 2026**

- Built a full-stack Android client management app for a local tattoo studio using Kotlin, Jetpack Compose, and Firebase Firestore, implementing MVVM architecture, real-time multi-device cloud sync, and an offline-first Room (SQLite) caching strategy for speed and reliability.
